Groundworks in KentBon Groundwork Ltd is based in Orpington, from where we deliver reliable groundwork solutions across Kent and Medway. With a trading history dating back to 1979, we are one of the most well-established providers of groundworks in Kent. Since we first opened our doors, we have been helping private customers and commercial clients alike with their groundwork needs, covering jobs as diverse as laying footings and foundations, installing foul drainage systems, and delivering both ground excavations and basements excavations. In the forty-plus years we have been in business, we have worked closely with domestic and commercial clients, as well as developers across Kent to meet their groundwork requirements. We continue to do so to this day, working on a diverse range of projects with values of up to £3m. Whether you are based in Bromley, Sevenoaks, Tunbridge Wells, Maidstone, Medway, Dartford, or beyond, you are guaranteed professional groundworks services of a superior quality.
