

Crushed Velvet Curtains

269 Wellington Road, Unit 1 ,Handsworth
Birmingham B20 2QQ
United Kingdom

Heavyweight Thick Fully Lined Material These heavyweight thermal curtains will transform your room with its light blocking qualities and unique super soft material crushed velvet curtains . Material: 100% Polyester with 100% iron eyelets, these are luxurious quality heavy weight curtains Machine washable at 30°C, Cool iron on reverse.
Width : Measure the full length of your curtain pole excluding the finials (decorative ends)
For Drop : Measure from the top of the pole to where you want your curtains to end. We recommend adding on 3cm to account for the material above the eyelet. Total your measurements to the nearest available sizes, for example if your measurements come to 46" (116cm) wide and 72" (182cm) drop, you should buy 1 set of 46" width x 72" drop curtains. Measurements are per curtain panel allowing enough material for curtains to hang with folds. The width will depend on the width of your curtain pole, and the length depends on where you want your curtain to end. We suggest:
The window sill : end measurement -1cm above the sill
Below the window sill : end measurement + 15cm under the sill
To the floor : end measurement - 1cm above the floor
