Archispace — Affordable Housing Development in Tauranga

Archispace is a purpose-driven property development company based in Tauranga, delivering high-quality, affordable housing across New Zealand. As a full end-to-end developer, we manage every stage of new housing developments, from land acquisition and feasibility through to design, consenting, construction, and delivery. We partner with private clients, iwi, community housing providers, and government organisations to create thoughtful residential outcomes that support long-term community wellbeing. Our work includes social housing projects, mixed-tenure neighbourhoods, and large-scale residential developments designed to meet

the needs of growing communities. As one of the region's forward-thinking residential development companies, we operate as both a development manager and a hands-on housing contractor, ensuring quality, value, and efficiency at every stage. Our focus is on building affordable homes that stand the test of time while delivering strong returns for partners and stakeholders.
